RICEMASTER ELECTRIC RICECOOKERS

57155

56822-56824

57137-57138

GENERAL

This specification lists the standard and optional features of Town electronically controlled 25 cup and 37 cup and 55 cup commercial electric rice cookers. The units are manufactured in the United States and have a TWO YEAR Limited Warranty, starting from our invoice date. Units work on either 120 Volts or 230 volts AC only. These rugged, field tested units feature an electronic control board and sensor to replace manual switches. This control system cooks better quality rice and is very dependable. The boards are designed by one of the foremost control companies in the world, exclusively for Town Food Service. All controls are on a touch pad. Town electronic rice cookers are the only units that have an On/Off touch switch with power indicator. Units are listed with ETL and NSF.
